Custom jewelry sets and a variety of jewelry items are available.

Customization Process for Jewelry:

1. Customer provides jewelry images or design sketches.
2. Quote sample cost based on customer requirements.
3. Create the sample.
4. Take photos or videos for customer reference (confirm modifications if needed).
5. Send sample to customer for final approval after confirmation.

About FKS jewelry

Welcome to our world of exquisite jewelry!

Our founder started in the jewelry industry at 19. Over 20 years, he has transformed his passion into unparalleled expertise.

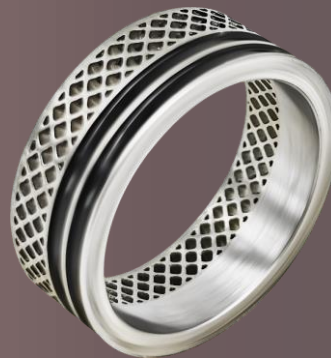

At our factory, we make high-quality products that meet and exceed our clients' expectations, while offering exceptional value.

Our advanced processing techniques set us apart. We do a portion of our work directly in gold jewelry factories, and our polishing processes achieve a level of precision and elegance that outshine the competition.

We make beautiful jewelry from copper, titanium, stainless steel, silver, and tungsten.
We also make custom designs for earrings, pendants, and more.

Sample Option

1. Based on samples, drawings, pictures or ideas provided by you, we can manufacture your **SAMPLES** according to your specifications. (ODM)
2. Choose from our stock of neutral samples. (OEM)

Thank you!

Contact us freely, simply tell us which you like.
